John George Bartholomew

Map Of The World 1860:

Mitchell's New General Atlas 1860 Robert Lindberg, Samuel Augustus Mitchell (Jr.), 2016 In 1860 Augustus Mitchell Jr printed one of the world's most accurate and artistic atlases. This reproduction of Mitchell's New General Atlas restores all 76 maps from the original plus its 26 pages of geological, statistical, and geographic information from 1860. Included are intriguing looks at the political boundaries of the United States at the outbreak of the Civil War as well as maps of other countries and regions that look vastly different today. In the nineteenth century, American citizens would routinely purchase a new map or atlas every year or two as these physical documents were the only way to learn geography. The beautiful floral bordered maps in this atlas were designed by the finest cartographers of this pivotal era in human history. Engraved on steel plates, printed in black and white and hand colored by artists, they continue to inspire wonder and awe.

The Social Life of Maps in America, 1750-1860 Martin Brückner, 2017-10-26 In the age of MapQuest and GPS, we take cartographic literacy for granted. We should not; the ability to find meaning in maps is the fruit of a long process of exposure and instruction. A cartocoded America, a nation in which maps are pervasive and meaningful, had to be created. *The Social Life of Maps* tracks American cartography's spectacular rise to its unprecedented cultural influence. Between 1750 and 1860, maps did more than communicate geographic information and political pretensions. They became affordable and intelligible to ordinary American men and women looking for their place in the world. School maps quickly entered classrooms where they shaped reading and other cognitive exercises; giant maps drew attention in public spaces; miniature maps helped Americans chart personal experiences. In short, maps were uniquely social objects whose visual and material expressions affected commercial practices and graphic arts, theatrical performances, and the communication of emotions. This lavishly illustrated study follows popular maps from their points of creation to shops and galleries, schoolrooms and coat pockets, parlors and bookbindings. Between the decades leading up to the Revolutionary War and the Civil War, early Americans bonded with maps. Martin Brückner's comprehensive history of quotidian cartographic encounters is the first to show us how.
