*Hong Kong in the Shadow of China* Richard C. Bush, 2016-10-11 A close up look at the struggle for democracy in Hong Kong Hong Kong in the Shadow of China is a reflection on the recent political turmoil in Hong Kong during which the Chinese government insisted on gradual movement toward electoral democracy and hundreds of thousands of protesters occupied major thoroughfares to push for full democracy now Fueling this struggle is deep public resentment over growing inequality and how the political system established by China and dominated by the local business community reinforces the divide between those who have profited immensely and those who struggle for basics such as housing Richard Bush director of the Brookings Institution's Center on East Asia Policy Studies takes us inside the demonstrations and the demands of the demonstrators and then pulls back to critically explore what Hong Kong and China must do to ensure both economic competitiveness and good governance and the implications of Hong Kong developments for United States policy

**The State and Capitalism in China** Margaret M. Pearson, Meg Rithmire, Kellee Tsai, 2023-06-30 China's contemporary political economy features an emboldened role for the state as owner and regulator and with markets expected to act in the service of party state goals How has the relationship between the state and different types of firms evolved This Element situates China's reform era political economy in comparative analytic perspective with attention to adaptations of its model over time Just as other types of economies have generated internal dynamics and external reactions that undermine initial arrangements so too has China's political economy While China's state has always played a core role in development over time prioritization of growth has shifted to a variant of state capitalism best described as party state capitalism which emphasizes risk management and leadership by the Chinese Communist Party CCP Rather than reflecting long held intentions of the CCP the transition to party state capitalism emerged from reactions to perceived threats and problems some domestic and some external These adaptations are refracted in the contemporary crises of global capitalism This title is also available as open access on Cambridge Core

**The United States, China, and Taiwan** Robert Blackwill, Philip Zelikow, 2021-02-11 Taiwan is becoming the most dangerous flash point in the world for a possible war that involves the United States China and probably other major powers warn Robert D Blackwill Council on Foreign Relations CFR Henry A Kissinger senior fellow for U S foreign policy and Philip Zelikow University of Virginia White Burkett Miller professor of history In a new Council Special Report The United States China and Taiwan A Strategy to Prevent War the authors argue that the United States should change and clarify its strategy to prevent war over Taiwan The U S strategic objective regarding Taiwan should be to preserve its political and economic autonomy its dynamism as a free society and U S allied deterrence without triggering a

Chinese attack on Taiwan We do not think it is politically or militarily realistic to count on a U S military defeat of various kinds of Chinese assaults on Taiwan uncoordinated with allies Nor is it realistic to presume that after such a frustrating clash the United States would or should simply escalate to some sort of wide scale war against China with comprehensive blockades or strikes against targets on the Chinese mainland If U S campaign plans postulate such unrealistic scenarios the authors add they will likely be rejected by an American president and by the U S Congress But they observe the resulting U S paralysis would not be the result of presidential weakness or timidity It might arise because the most powerful country in the world did not have credible options prepared for the most dangerous military crisis looming in front of it Proposing a realistic strategic objective for Taiwan and the associated policy prescriptions to sustain the political balance that has kept the peace for the last fifty years the authors urge the Joe Biden administration to affirm that it is not trying to change Taiwan s status work with its allies especially Japan to prepare new plans that could challenge Chinese military moves against Taiwan and help Taiwan defend itself yet put the burden of widening a war on China and visibly plan beforehand for the disruption and mobilization that could follow a wider war but without assuming that such a war would or should escalate to the Chinese Japanese or American homelands The horrendous global consequences of a war between the United States and China most likely over Taiwan should preoccupy the Biden team beginning with the president the authors conclude **CHINA DREAM**

Bush,2021-04-13 How Taiwan can overcome internal stresses and the threat from China Taiwan was a poster child for the third wave of global democratization in the 1980s It was the first Chinese society to make the transition to democracy and it did so gradually and peacefully But Taiwan today faces a host of internal issues starting with the aging of society and the resulting intergenerational conflicts over spending priorities China s long term threat to incorporate the island on terms similar to those used for Hong Kong exacerbates the island s home grown problems Taiwan remains heavily dependent on the United States for its security but it must use its own resources to cope with Beijing s constant intimidation and pressure How Taiwan responds to the internal and external challenges it faces and what the United States and other outside powers do to help will determine whether it is able to stand its ground against China s ambitions The book explores the broad range of issues and policy choices Taiwan confronts and offers suggestions

both for what Taiwan can do to help itself and what the United States should do to improve Taiwan's chances of success

**The China-Hong Kong Connection** Yun Wing Sung, Enrong Song, 1991 This is an account of the middleman role Hong Kong has played in China's Open Door Policy It explains the paradoxical situation by which Hong Kong's role as intermediary in China's commodity trade is becoming more prominent in spite of the fact that since the development of the Open Door Policy in 1979 China has established many direct diplomatic commercial and transportation links with the outside world The book makes an important contribution to understanding China's various phases of economic reform and its interactions with global economic markets Moreover its arrival is timely given the forced isolation of China after the events in Tiananmen Square in June 1989 as well as the fact that few years remain before Hong Kong ceases to be a British colony to become part of China Dr Sung predicts that China's demands on Hong Kong's capacity as intermediary will increase dramatically when this happens
